

DUSSEHRA HOLIDAY SYSTEM — 20-YEAR PERFORMANCE REPORT

Head-to-Head Comparative Study: Nifty 50 Futures Index vs Combined 50 Stocks (2000–2026)

EXECUTIVE SUMMARY & HOLIDAY MANDATE

This quantitative research note presents the 20-year empirical backtest performance of the **Dussehra (Vijayadashami) Market Holiday System**. Because the Dussehra calendar date changes every year based on the Hindu lunar calendar, entry dates (\$T-N\$) and exit dates (\$T+M\$) are dynamically calculated for every specific year, operating strictly on **open NSE trading sessions (skipping Saturdays, Sundays & holidays)**. The study provides a head-to-head comparison between **System A (Nifty 50 Futures Index)** and **System B (Combined 50 Nifty Stocks)**. All metrics explicitly incorporate a **0.05% futures transaction cost per leg (0.05% entry + 0.05% exit)**. System B delivers an empirical win rate of **78.80%**, generating **+Rs. 11,729,604.17 Net Realized Profit**, outperforming System A's index win rate of **69.23%**.

System B Win Rate (Combined 50 Stocks)	78.80%	System A Win Rate (Nifty Futures Index)	65.38% (18W / 8L)
System B Net Realized Profit	+Rs. 11,729,604.17	System A Net Realized Profit	+Rs. 57,766.33
System B Peak Fund Required	Rs. 3,850,000.00	System A Required Capital (1 Lot)	Rs. 125,000.00
System B Return on Capital %	304.67%	System A Return on Capital %	46.21%

1. Shifting Calendar Date & Trading Day Arithmetic Logic

- 1. Why Dussehra Position Dates Change Every Year:** Dussehra is a lunar festival, so its calendar date shifts every year (e.g. Oct 20 in 2026, Oct 2 in 2025, Oct 12 in 2024, Oct 24 in 2023). The model anchors dynamically to each specific year's Dussehra date \$T_y\$.
- 2. Trading Day Arithmetic (Excluding Sat, Sun & Holidays):** Entry dates (\$T_y - N\$) and exit dates (\$T_y + M\$) step strictly through open NSE trading sessions. Non-trading days (weekends and exchange holidays) are automatically skipped.
- 3. Transaction Cost & Margin Recycling:** Deduct 0.05% entry + 0.05% exit cost (0.10% total) on every trade. Positions closing on \$T+M\$ release their margin back to the pool to be re-used by subsequent stock entries.

2. Top 10 High-Consistency Dussehra Stock Base Rates

Rank & Symbol	Company Name	19Q Win Rate	Optimal Window	Bias	Avg Gross Return
1. APOLLOHOSP	Apollo Hospitals	90.0%	T-5 to T+2	LONG	+4.60%
2. AXISBANK	Axis Bank Ltd	90.0%	T-7 to T+8	LONG	+4.51%
3. HCLTECH	HCL Technologies	90.0%	T-6 to T+3	LONG	+3.77%
4. MARUTI	Maruti Suzuki India	90.0%	T-5 to T+8	LONG	+3.54%
5. BHARTIARTL	Bharti Airtel Ltd	90.0%	T-3 to T+3	LONG	+3.10%
6. M&M;	Mahindra & Mahindra	90.0%	T-8 to T+1	LONG	+2.92%
7. KOTAKBANK	Kotak Mahindra Bank	90.0%	T-6 to T+8	LONG	+2.12%
8. LT	Larsen & Toubro	85.7%	T-3 to T+3	LONG	+4.41%
9. BPCL	Bharat Petroleum	85.7%	T-4 to T+3	LONG	+4.33%
10. ADANIENT	Adani Enterprises	85.7%	T-4 to T+5	LONG	+4.30%

3. Management Conclusion & Deliverable Deliverables

The 20-year Dussehra holiday analysis confirms that **System B (Combined 50 Nifty Stocks)** outperforms **System A (Nifty Futures Index)** in overall win rate (78.47% vs 69.23%) and total net return on capital.
