

NIFTY 50 DUSSEHRA / VIJAYADASHAMI HOLIDAY DRIFT SYSTEM

A Quantitative Pre- & Post-Holiday Futures Drift Execution Model across 4 Audited Cycles (2022–2025)

EXECUTIVE SUMMARY & CORE MANDATE

This note presents the quantitative backtest performance and execution playbook for the Nifty 50 Dussehra / Vijayadashami Holiday Drift System. The strategy captures the systematic pre-holiday run-up and post-holiday digestion drift around the Dussehra / Vijayadashami holiday across the Nifty 50 futures universe. Over the four most recent cycles (2022–2025) it delivers an **85.00% win rate**, generating **+₹38 Lakhs** gross profit (one lot per stock) at a **10.36 profit factor**.

Net Realized Profit (4-Cycle, 1 lot/stock)	+₹38 Lakhs	Win Rate (4-Cycle Audited)	85.00% (170W / 30L)
Profit Factor	10.36 (Gross W/L Ratio)	Average Trade Return	+2.92% (+3.94% W / -2.82% L)
Gross Winnings	+₹42 Lakhs	Gross Losses	-₹4 Lakhs
Best Cycle	Oct-2024 (+₹19L, 92.0%)	Capital Deployed / Cycle (20% margin)	~₹72.2 Lakhs (50 stocks × 1 lot)
Index Confirmation (Nifty Fut, 2000–2026)	69.23% over 26 occurrences	Aggregate Optimal Window (Index)	T-6 to T+2 · SHORT
Next Event	20-Oct-2026 (Tue) · NSE Closed	Latest Cycle (Oct-2025)	90.0% Win Rate (+₹7L)

1. Core Algorithmic Logic — Buy-Before / Sell-After Holiday Model

The system is **non-predictive positioning around a scheduled exchange holiday**. Rather than forecasting news, it anchors to the fixed NSE Dussehra / Vijayadashami holiday date and uses each stock's own multi-year base rate to enter ahead of the holiday and exit after the post-holiday drift completes.

The Two-Leg Trade Structure

- Leg 1 — Buy Before (Anticipation Run-Up):** enter N trading days before the holiday date T at 09:20 AM, as participants position into the festive cycle.
- Leg 2 — Hold Through & Sell After (Digest):** hold across the closed session and exit M trading days after T at 03:15 PM, capturing the full post-holiday drift.

Trade Return: $\text{Return}_i = ((P_{\text{exit}, T+M} - P_{\text{entry}, T-N}) / P_{\text{entry}, T-N}) \times \text{Direction}_i$, where Direction = +1 (LONG) or -1 (SHORT), and T is the NSE trading day of the Dussehra holiday.

2. Four-Cycle Audited Backtest Performance (2022–2025)

The table below documents the empirical per-stock futures backtest across the four most recent Dussehra / Vijayadashami cycles, built from the master holiday execution logs (17_NSE_Holidays_Reports / 14_Dussehra). Each cycle deploys all 50 Nifty 50 futures, one lot per stock, using each stock's own calibrated pre-/post-holiday window. The 20-Oct-2026 (Tue) event is the upcoming live cycle.

Cycle	Event & Window	Status	Win Rate	W / L	Net Realized PnL	Avg Return
20-Oct-2026	20-Oct-2026 (Tue) — Dussehra cycle	UPCOMING	Pending	—	₹0 (Pending)	SHORT
Oct-2025	Dussehra 2025-10-02 · window 22-Sep to 09-Oct	LATEST CYCLE	90.0%	45 / 5	+₹743,519	+2.26%
Oct-2024	Dussehra 2024-10-12 · window 01-Oct to 18-Oct	HISTORICAL	92.0%	46 / 4	+₹1,860,881	+4.80%
Oct-2023	Dussehra 2023-10-24 · window 12-Oct to 31-Oct	HISTORICAL	68.0%	34 / 16	+₹409,222	+1.39%
Oct-2022	Dussehra 2022-10-05 · window 23-Sep to 12-Oct	HISTORICAL	90.0%	45 / 5	+₹779,252	+3.25%

3. Top 10 Consistent Stock Performers (4-Cycle Base Rate)

The strategy does not treat all stocks equally. Each stock's optimal entry lead (N) and exit hold (M) window and its LONG/SHORT lean are calibrated against its own Dussehra history. The ten most profitable Nifty 50 names across the four cycles:

Rank & Symbol	Company Name	4-Cycle Win Rate	Optimal Window	Direction	Total 4-Cycle PnL
1. ADANIENT	Adani Enterprises Ltd	100%	T-7 to T+5	SHORT	+₹279,671
2. BRITANNIA	Britannia Industries Ltd	100%	T-7 to T+5	SHORT	+₹179,043
3. JIOFIN	Jio Financial Services Ltd	100%	T-7 to T+5	SHORT	+₹170,279
4. M&M	Mahindra & Mahindra Ltd	100%	T-7 to T+5	SHORT	+₹163,392
5. BAJAJ-AUTO	Bajaj Auto Ltd	75%	T-7 to T+5	SHORT	+₹159,412
6. BAJAJFINSV	Bajaj Finserv Ltd	100%	T-7 to T+5	SHORT	+₹151,149
7. ASIANPAINT	Asian Paints Ltd	100%	T-7 to T+5	SHORT	+₹144,690
8. HINDUNILVR	Hindustan Unilever Ltd	100%	T-7 to T+5	SHORT	+₹121,666
9. ULTRACEMCO	UltraTech Cement Ltd	75%	T-6 to T+4	SHORT	+₹117,952
10. EICHERMOT	Eicher Motors Ltd	100%	T-7 to T+5	SHORT	+₹117,279

4. Detailed Position-Taking Log — Latest Cycle (Oct-2025)

Full 50-stock execution ledger for the most recent Dussehra (holiday 2025-10-02), ranked by PnL. Entries at 09:20 AM on day T–N, exits at 03:15 PM on day T+M, one futures lot per stock. Cycle result: **90.0% win rate, +₹743,519** across 45W / 5L. (Ranks 1–25; continued next page.)

5. Capital Deployment, Margin Rules & Execution Playbook

1. Position Sizing & Margin

Sizing adheres to real NSE futures lot sizes, one lot per stock. Margin is the exchange 20% initial requirement (SPAN + Exposure), aggregating to ~₹72.2 Lakhs of deployed capital for the full 50-stock cycle.

2. Execution Timings

- **Entry:** 09:20 AM on trading day T–N (limit / market-at-open).
- **Exit:** 03:10–03:25 PM on trading day T+M. The position is held straight through the exchange holiday.

3. Non-Predictive Anchor

T is the NSE trading day of the Dussehra / Vijayadashami holiday (the exchange is closed that day). The model positions around the holiday liquidity / festive-cycle drift rather than forecasting news.

4. Options Alternative & Stop-Loss

For capital-efficient deployment, buy near-month ATM/ITM Calls (LONG bias) or Puts (SHORT bias), capping risk to premium paid. A hard stop-loss of –3.5% on spot guards against outlier holiday-window shocks.

6. Institutional Conclusion & Next Steps

Across four audited cycles the Nifty 50 Dussehra Holiday Drift System delivered a **85.0% win rate**, **10.36 profit factor** and **+₹38 Lakhs** net profit (1 lot/stock), independently corroborated by a **69.23%** base rate on the Nifty futures index over 26 occurrences since 2000.

Recommendations

- Stage entries into the **20-Oct-2026 (Tue)** event per each stock's calibrated T–N lead.
- Prioritise the consistent performers in Section 3 (highest base-rate names).
- Maintain automated 09:20 AM entry / 03:15 PM exit execution and the –3.5% spot stop-loss.
