

NIFTY 50 MAHATMA GANDHI JAYANTI HOLIDAY DRIFT SYSTEM

A Quantitative Pre- & Post-Holiday Futures Drift Execution Model across 4 Audited Cycles (2022–2025)

EXECUTIVE SUMMARY & CORE MANDATE

This note presents the quantitative backtest performance and execution playbook for the Nifty 50 Mahatma Gandhi Jayanti Holiday Drift System. The strategy captures the systematic pre-holiday run-up and post-holiday digestion drift around the 02 October national holiday across the Nifty 50 futures universe. Over the four most recent cycles (2022–2025) it delivers an **87.50% win rate**, generating **+₹33 Lakhs** gross profit (one lot per stock) at a **14.17 profit factor**.

Net Realized Profit (4-Cycle, 1 lot/stock)	+₹33 Lakhs	Win Rate (4-Cycle Audited)	87.50% (175W / 25L)
Profit Factor	14.17 (Gross W/L Ratio)	Average Trade Return	+2.66% (+3.41% W / -2.63% L)
Gross Winnings	+₹36 Lakhs	Gross Losses	-₹3 Lakhs
Best Cycle	Oct-2024 (+₹12L, 90.0%)	Capital Deployed / Cycle (20% margin)	~₹72.9 Lakhs (50 stocks × 1 lot)
Index Confirmation (Nifty Fut, 2000–2026)	73.08% over 26 occurrences	Aggregate Optimal Window (Index)	T-4 to T+7 · LONG
Next Event	02-Oct-2026 (Fri) · NSE Closed	Latest Cycle (Oct-2025)	92.0% Win Rate (+₹8L)

1. Core Algorithmic Logic — Buy-Before / Sell-After Holiday Model

The system is **non-predictive positioning around a scheduled exchange holiday**. Rather than forecasting news, it anchors to the fixed NSE Mahatma Gandhi Jayanti holiday date (02 October) and uses each stock's own multi-year base rate to enter ahead of the holiday and exit after the post-holiday drift completes.

The Two-Leg Trade Structure

- Leg 1 — Buy Before (Anticipation Run-Up):** enter N trading days before the holiday date T at 09:20 AM, as participants position into the festive / Q3-earnings run-in.
- Leg 2 — Hold Through & Sell After (Digest):** hold across the closed session and exit M trading days after T at 03:15 PM, capturing the full post-holiday drift.

Trade Return: $\text{Return}_i = ((P_{\text{exit}, T+M} - P_{\text{entry}, T-N}) / P_{\text{entry}, T-N}) \times \text{Direction}_i$, where $\text{Direction} = +1$ (LONG) or -1 (SHORT), and T is the NSE trading day of the Gandhi Jayanti holiday.

2. Four-Cycle Audited Backtest Performance (2022–2025)

The table below documents the empirical per-stock futures backtest across the four most recent Mahatma Gandhi Jayanti cycles, built from the master holiday execution logs (*17_NSE_Holidays_Reports / 13_Mahatma_Gandhi_Jayanti*). Each cycle deploys all 50 Nifty 50 futures, one lot per stock, using each stock's own calibrated pre-/post-holiday window. Oct-2026 is the upcoming live event.

Cycle	Event & Window	Status	Win Rate	W / L	Net Realized PnL	Avg Return

3. Top 10 Consistent Stock Performers (4-Cycle Base Rate)

The strategy does not treat all stocks equally. Each stock's optimal entry lead (N) and exit hold (M) window and its LONG/SHORT lean are calibrated against its own Gandhi Jayanti history. The ten most profitable Nifty 50 names across the four cycles:

5. Capital Deployment, Margin Rules & Execution Playbook

1. Position Sizing & Margin

Sizing adheres to real NSE futures lot sizes, one lot per stock. Margin is the exchange 20% initial requirement (SPAN + Exposure), aggregating to ~₹72.9 Lakhs of deployed capital for the full 50-stock cycle.

2. Execution Timings

- **Entry:** 09:20 AM on trading day T–N (limit / market-at-open).
- **Exit:** 03:10–03:25 PM on trading day T+M. The position is held straight through the exchange holiday.

3. Non-Predictive Anchor

T is the NSE trading day of the Mahatma Gandhi Jayanti holiday (02 October; the exchange is closed that day). The model positions around the holiday liquidity/festive-cycle drift rather than forecasting news.

4. Options Alternative & Stop-Loss

For capital-efficient deployment, buy near-month ATM/ITM Calls (LONG bias) or Puts (SHORT bias), capping risk to premium paid. A hard stop-loss of –3.5% on spot guards against outlier holiday-window shocks.

6. Institutional Conclusion & Next Steps

Across four audited cycles the Nifty 50 Gandhi Jayanti Holiday Drift System delivered a **87.5% win rate**, **14.17 profit factor** and **+₹33 Lakhs** net profit (1 lot/stock), independently corroborated by a **73.08%** base rate on the Nifty futures index over 26 occurrences since 2000.

Recommendations

- Stage entries into the **02-Oct-2026 (Fri)** event from late September 2026 per each stock's calibrated T–N lead.
- Prioritise the consistent performers in Section 3 (100% base-rate names: JIOFIN, ULTRACEMCO, ICICIBANK, TATACONSUM).
- Maintain automated 09:20 AM entry / 03:15 PM exit execution and the –3.5% spot stop-loss.
