

# Mahatma Gandhi Jayanti (2-Oct-2026) — Missed Positions: New Entry vs Avoid

Nifty-50 holiday drift playbook • as of **28-Sep-2026** • anchor 02-Oct-2026 (Fri) • catch-up session = 28-Sep (T-4)

Positions whose entry opened before today were **missed**. Today is a trading day at **T-4**, so a **new entry** (enter 28-Sep, hold to the original exit) still captures the event-day & post-event drift. A stock is marked **AVOID** only if its historical setup is a net loser (or the window has closed).

MISSSED POSITIONS

**28**

NEW ENTRY POSSIBLE

**27**

AVOID

**1**

**How to read it: Runway Left** = trading sessions from 28-Sep to the exit vs the full window. **Est %** in the action = historical avg return × runway fraction — a **conservative linear** figure. Holiday drift usually concentrates around T-1–T+2, which a T-4 entry today still captures, so short-hold names (T+1/T+2 exits) likely retain **more** than the linear estimate. Directions: LONG=BUY, SHORT=SELL the near-month future / 1% ITM option. Sizing is your call — a late entry has less runway, so scale accordingly.
