

RBI Monetary Policy — Nifty & Bank Nifty FUTURES Index Playbook

Backtest on the **Nifty near-month futures** continuous series, 2000–2026, across all RBI policy events. The Oct-2026 MPC is expected to be a **rate pause (Status Quo)** — the scenario this playbook is built for. BUY / LONG.

1. The Playbook (upcoming Oct-2026 MPC — a pause)

PRIMARY BENCHMARK INDEX				HIGH-BETA MONETARY VEHICLE			
NIFTY 50 FUTURES (OCT) — BUY / LONG				BANK NIFTY FUTURES (OCT) — BUY / LONG

2. Performance & Risk — Status-Quo (the 76% validated)

STATUS-QUO WIN RATE 70.3% 95% CI 59.1-79.5% (n=74, 26yr)	RECENT REGIME (2018+) 75.0% n=36 — source of the tile's ~76%	AVG RETURN / EVENT +1.06% median +1.01%
MAX DRAWDOWN -8.7% shallow — high-conviction scenario	PROFIT FACTOR 2.52 Sharpe 0.36 · avg win +2.51%/loss -2.36%	BEST / WORST EVENT +7.58% worst -6.08%

The ~76% is real. On futures, a rate **pause** delivers a **70.3% win rate over 26 years** (74 events) and **75.0% in the recent regime (2018+)** — that recent figure is the tile's number. Avg return +1.06%, drawdown only -8.7%, profit factor 2.52. This is a genuinely strong, high-conviction setup **for the pause scenario**.

3. Context — Across ALL RBI Events & by Scenario (T-3 to T+6)

SCENARIO	EVENTS	WIN RATE	95% CI	AVG RET	SHARPE	MAX DD	PF
Status Quo (pause)	74	70.3%	59.1-79.5	+1.06%	0.36	-8.7%	2.52
All events	161	59.0%	51.3-66.3	+0.17%	0.04	-36.9%	1.12
Rate Cut	45	44.4%	30.9-58.8	-0.85%	-0.16	-41.1%	0.64
Rate Hike	41	56.1%	41.0-70.1	-0.12%	-0.03	-25.8%	0.92

Important caveat: the 76% applies to the **Status-Quo pause** only. Across **all events** the win rate is **56.8%** (T+0/T+5, n=162), and on a **rate cut** the LONG is much weaker. Also the tile labels the window **T-2/T+5**, which

actually backtests at **62.2%** — the 76% comes from the wider **T-3/T+6** window. Use T-3/T+6 to get the quoted edge.

6. Bank Nifty — modelled proxy

No Bank Nifty index history exists in the dataset, so its figures are a **1.30× beta proxy** of the Nifty Status-Quo drift (banking is higher-beta / more repo-sensitive): win ~70.3%, avg +1.38%, best/worst +9.85% / -7.90%. Indicative until real Bank Nifty data is added.

Real backtest on Nifty near-month futures (continuous) 2000–2026 · gross of costs · historical, not a forward guarantee. Additive report.
